Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

1. Claims 1, 2, 4, and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Hwang.

With regard to claim 1, Hwang (US Pat. No. 6,234,817) discloses an electrical connector comprising:

a plug connector (20) having a guide element (24);

a single composite mating connector (10) having a recess (14),

the recess being dimensioned so that during an insertion process the guide element is guided into the recess and in an inserted state the recess is set apart from the guide element (since the plug connector is movable to with regard to the mating connector when both mated, col. 2, lines 46-48).

With regard to claims 2, 4, and 5, Hwang disclose (Fig. 3) a centering element (25) having a lug-like form and configured to cooperate with the mating connector (10).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 2833

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hwang in view of Takase et al.

Hwang discloses all of the limitations except for the guide element (24) having a cam like form and rounded edges.

To provide the guide element with cam-like configuration and rounded edges, would have been an obvious matter of design absent any criticality and since the function performed by the guide element is the same. Additionally the specific configuration of the guide element is well known in the art (For example, Takase et al, WO99/36995, Fig. 5,6).

Response to Arguments

Applicant's arguments filed 09/30/2002 have been fully considered but they are not persuasive. Applicants argue that Hwang's statement (col. 2, lines 46-48) used by Examiner to reject the limitation "the recess is set apart from the guide element" is simply incoherent and ambiguous. According to Applicants, another Hwang statement (col. 1, lines 46-53) better describe the Hwang's invention and does not reject the above mentioned limitation.

However, both statements of Hwang suggest the same – the designed movement of the connectors in a direction perpendicular to a mating direction. According to Hwang, that movement is possible due to differences in diameter of the recess and the guiding member. Hence, Hwang meets the claim's limitation.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH**

Art Unit: 2833

shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
